Notice of material variance

The board of Directors notes that the results for the year ended 31 December 2023 vary negatively compared to the forecasts published in the Prospectus dated February 2021, however they build on the performance of the financial year ended 31 December 2022. International conflicts followed by increasing inflation rates and a slowdown in the global economy have led customers to be cautious, delaying projects and stretching investments to a minimum. A positive turnaround has been observed throughout 2023. With the new major processing outsourcing agreement concluded towards the end of the year, the increase in processing volumes, a strong pipeline, and the launch of new products, it is expected that business will ramp positively up in 2024.
